

Fraser River Berthings

Agents are urged to place a request for "Window Times" as all vessels entering the river must request a window.

The table below indicates Sandheads water levels only and does not take into account berthing arrangements. Hydrographic data can vary throughout the year.

For your guidance the following table shows the maximum draft allowed at the various tides at Sand Heads.

The maximum draft for the main channel of the Fraser River is 11.5 meters on a 3.3 meter tide at Sand Heads. Allowable drafts will be incremental in accordance with the table shown below. These drafts will remain in effect until further notice.

Draft (meters)	Tide (meters)
11.5	3.3
11.0	2.8
10.5	2.3
10.0	1.8
9.5	1.3
9.0	0.8

This information is applicable only to the main River drafts and does not affect any restrictions that may apply at various berths.
